## What is SILP?

SILP is a learning model which engages practitioners in case reviews, focussing on why those involved acted in a certain way. It follows a systems methodology, as is required by Working Together to Safeguard Children 2018. SILP also highlights what is working well and patterns of good practice. Tried and tested in over 150 reviews, the numbers involved in commissioning, participating in and delivering this model has grown.

SILP has been described by participants as action learning, commenting on the problem-solving approach and quality of outcomes:

'The SILP process allows for more meaningful learning, it's less threatening for practitioners, so they are willing to engage as all agencies work together to identify the learning outcomes with the help of the facilitator.' Designated Lead Nurse for Safeguarding'
